

# Ipswitch WS\_FTP Professional 2007

## The Smarter Way to Transfer Files

Datasheet

### Transfer files anywhere, anytime, with complete security

Ipswitch WS\_FTP® Professional 2007, the world's most popular file transfer client with over 40 million users, easily moves data and transfers files anywhere, at anytime, with complete security. WS\_FTP Professional delivers lightning-fast transfer speeds, industry-leading security and time saving automation features such as 256-bit transfer encryption, OpenPGP file encryption, file integrity checking, scheduling, backup, folder synchronization, compression, scripting and email notification capabilities.

No other file transfer client offers the ease-of-use, performance, functionality and security that WS\_FTP Professional delivers. WS\_FTP is used by millions of customers worldwide to transfer billions of files every week. Our fast transfer speeds and acclaimed customer support make WS\_FTP Professional the clear choice!

### Bullet-proof security protects files before, during and after transfer

WS\_FTP Professional 2007 protects your files before, during and after transfer. Best-in-class 256-bit Advanced Encryption Standard (AES) encryption secures files during SSL and SSH transfers, combined with the industry's first integrated OpenPGP mode to encrypt individual files, enables the safe transfer and storage of your private and confidential files and data. File integrity checking uses built-in SHA256 and SHA512 file verification mechanisms to guarantee delivery and validate that transferred files have not been compromised in any way and ensure that the source and destination are exact matches.

Secure data with OpenPGP file encryption and 256-bit transfer encryption

Safely back up important files and folders to virtually any drive, device or server

Easily locate and transfer files using integrated Google™, Copernic™ and Windows® desktop search

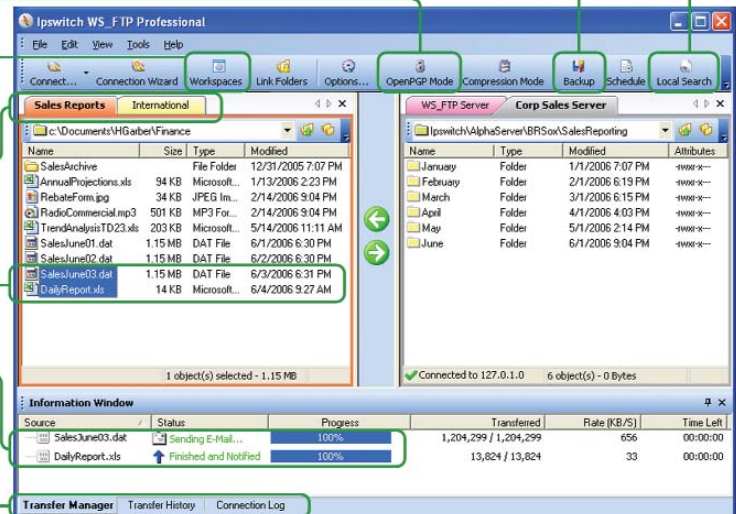

Save and instantly reconnect to frequently used local and server connections

View multiple local and server connections with the tabbed interface

Transfer multiple files to and from multiple servers quickly and easily

Alert people with email notifications the instant a file transfer occurs

Track the movement of data with detailed logging

WS\_FTP Professional 2007: Lightning-fast transfer SPEED, industry-leading SECURITY and time-saving AUTOMATION features and more.

### Automation features help simplify tasks and enhance productivity

WS\_FTP Professional 2007 includes an industry-leading set of easily programmed automation features that simplify file transfer tasks, save time and improve communications.

*Schedule:* Program one-time or recurring file transfers to occur automatically.

*Backup:* Safely archive folders and files to protect against data loss. Ability to schedule and compress backups to any location such as USB or DVD drives, network directories or server connections.

*Synchronization:* Have one folder mirror the contents of another. Easily define which files get transferred and how new or updated files are handled. Great tool for updating a website or sharing files on a server.

*Compression:* Automatically compress files into .ZIP format before uploading.

*Scripting:* Automate recurring transfer tasks with the programmable scripting tool.

*Email Notifications:* Automatically send email notifications when file transfers occur to immediately inform people that new file has been transferred. Many customers also send email confirmations to themselves to verify that a file transfer happened.

### WS\_FTP Professional 2007 includes a wide range of features and capabilities:

- Getting Started Guide, tutorials and Connection Wizard provide easy instructions on connecting to any FTP server and transferring files. The Security and Tools Guides promote advanced use.
- Choose from a wide variety of file transfer protocols, including FTP, SSL, SSH and HTTPS.
- Clean, intuitive and easy-to-use interface with simple drag-and-drop or 1-button transfers.
- Save and instantly reconnect to multiple local and server connections with WS\_FTP Workspaces.
- Ability to transfer multiple files at once and perform server-to-server transfers.
- Easily locate and transfer files with integrated Google™, Copernic™ and Windows® desktop search.
- View, create and resize thumbnails of images stored on your computer or any remote server.
- Linked Folders lets you simultaneously navigate any two connections with the same tree structure.
- Keep records of your WS\_FTP usage with Transfer Manager, Transfer History and Connection Log.
- Best-in-class security! 256-bit AES encryption is the highest level commercially available in FTP clients. OpenPGP public-key/private-key encryption supports AES and 3DES ciphers and key strengths of up to 4,096 bits. SHA256 and SHA512 guarantees uncompromised file transfer.
- Configure WS\_FTP to look and act exactly the way you want. Choose from nine pre-configured skins or design your own interface, and select your color, sounds toolbar and sorting preferences.
- Centrally manage and rapidly deploy multiple-computer installations with Citrix® terminal services software management and silent install capabilities.
- You can move any size and type of files between your computer and a remote FTP server anywhere on the Internet, such as WS\_FTP Server.
- English and German language editions.

### System Requirements

- Windows 2000, Windows XP, Windows Server 2003™. 32MB of RAM and 32MB of disk space.
